

PARTIES TO DISPUTE:

Brotherhood of Maintenance of Way Employees
and
Burlington Northern and Santa Fe Railway
(Former ATSF Railway Company)

STATEMENT OF CLAIM:

Claim of the System Committee of the Brotherhood that:

1. The Carrier violated the Agreement on December 22, 2003, when it dismissed the Claimant, Mr. T. R. Cardwell, for allegedly violating Maintenance of Way Operating Rule 1.5; BNSF Policy on the Use of Alcohol and Drugs, a second time within 10-years; and BNSF policy on Employee Performance Accountability, when he tested positive for a controlled substance on December 10, 2003.
2. As a consequence of the violation referred to in part (1), the Carrier shall immediately return the Claimant to service, remove any mention of this incident from his personal record, and make him whole for any wages lost account of this incident. [Carrier File No. 14-04-0027. Organization File No. 170-1312-041.CLM].

FINDINGS AND OPINION:

Upon the whole record and all the evidence, the Board finds that the Carrier and Employees ("Parties") herein are respectively carrier and employees within the meaning of the Railway Labor Act, as amended, and that this Board is duly constituted by agreement and has jurisdiction of the dispute herein.

The Claimant, Mr. Timothy R. Cardwell, became employed by the Carrier as a Maintenance of Way Welder on April 23, 2001. On February 5, 2003, he was required to undergo a random test for the use of alcohol and/or drugs. The test disclosed the presence of Amphetamine and Methamphetamine in his urine. The Carrier's Maintenance of Way Operating Rules and the United States Department of Transportation's drug and alcohol regulations prohibit covered employees from performing service when testing positive for certain controlled substances.

Provisions of the Carrier's Employee Assistance Program permit employees who test positive for the first time to be placed on a leave of absence for the purpose of evaluation, treatment, and education. If they are determined to be free of a mental or physical disorder, and can pass a return-to-work drug/alcohol test, they will be permitted to resume work, subject to follow-up testing from time to time.

The Claimant satisfactorily completed the necessary requirements, and was authorized to return to service on April 10, 2003. He was advised that he would be subject to periodic testing for a period of five years from the date of his return to work. He was also advised that more than one confirmed positive test either for any controlled substance or alcohol during any ten-year period would subject him to dismissal. The Claimant's signature on a copy of the communication outlining the foregoing conditions, returned to the Carrier's Manager of Drug & Alcohol Testing, acknowledged his having read and understood them.

On December 10, 2003, the Claimant was required to submit to a follow-up test, and the laboratory's test report indicated the presence, again, of Amphetamine and Methamphetamine in his urine specimen. This occurring some seven months after his return to service, he was sent a letter by the Carrier's Division Engineer on December 22, 2003, reading in part as follows:

I have been advised by the Carrier's Medical Department, that you have violated the Carrier's Policy on Use of Alcohol and Drugs by testing positive a second time in a ten-year period for a follow up drug test conducted on December 10, 2003, which warrants removal from service under said policy.

Carrier records disclose that you tested positive for a controlled substance on February 5, 2003.

- Section 7.9 of the Burlington Northern Santa Fe Policy Use of Alcohol and Drugs dated September 1, 1999, copy of which was sent to all Santa Fe Employees, provides dismissal from service for employees who have more than one confirmed positive test either for any controlled substance or alcohol, obtained under any circumstances during any 10-year period.

For the reasons given above, effective immediately, your seniority and employment with the Burlington Northern Santa Fe Railway are terminated. If you dispute this action taken, a claim may be filed on your behalf for reinstatement, which must be presented within sixty (60) days from the date of this letter pursuant to the Letter of Understanding dated June 24, 1991, between the Carrier and Brotherhood of Maintenance of Way Employees [*sic*].

A claim was promptly and timely submitted by the Organization, which argues that the Letter of Understanding dated June 24, 1991, cited by the Division Engineer, was only intended to amend an earlier Letter of Understanding dated April 1, 1990, because the Carrier had reduced the period from 90 days to 45 days within which an employee must provide a negative test result, following the first-time positive result. The Organization further argues that the Letter of Understanding dated June 24, 1991 was not intended to be used as an instrument to dismiss employees without an investigation, nor to endorse the Carrier's Policy on the Use of Alcohol and

Drugs (Policy). The Organization concludes that the Carrier acted improperly in terminating the Claimant under the Policy, it being a rule outside the terms of the Collective Bargaining Agreement.

The Organization further argues that the Claimant had taken several medications on December 9, 2003, due to having symptoms of a cold and influenza. He readily took the random test on his return to work on December 10. Then, less than 24 hours later, he submitted to another test for the use of drugs and alcohol, on December 11, due to his application for a transfer into Train Service. The urine specimen submitted on December 11, yielded a negative result. There is an implication that the medications may have accounted for the positive test result.

The Organization also contends that the Carrier violated Agreement Rule 13 when it denied the Claimant his right to an investigation. It cites several Awards of the National Railroad Adjustment Board holding that an investigation is required before discipline is administered.

The Carrier responds that the laboratory test results clearly show that the Claimant twice tested positive for controlled substances within a ten-year period. It further contends that it properly used the provisions of the two Letters of Understanding, which permit it to dismiss an employee without holding an investigation, although the Organization has an opportunity to present a claim on the employee's behalf. The discipline was within the scope of both the Agreement and the Policy.

The Carrier further argues the Claimant was in violation of Maintenance of Way Operating Rule (MWOR) 1.5, which prohibits employees from having prohibited substances in their bodily fluids when on duty. The Carrier also contends that it properly imposed the requirements of Appendix C of its Policy for Employee Performance Accountability (PEPA). Included within the dismissible rule violations listed in this Appendix C is a second positive test for drugs or alcohol within a ten-year period:

Refusal to submit (at any time) to required testing for drug or alcohol use, adulteration of sample, second violation of Rule 1.5 (former Rule G), second positive test within 10 years, or failure to comply with instructions of the Medical Director.

The Carrier denied the Organization's claim, and the dispute has been referred to this Board for its decision, based on the record.

The Organization's allusion to the negative test result on December 11, 2003, suggests some question about the validity of the positive test on December 10, 2003. (It does not contest the validity of the laboratory test results for February 5, 2003.) The Board believes there are plausible reasons why urine specimens taken on two consecutive days may yield differing results.

Neither of the Parties has submitted any data on the length of time it takes these prohibited substances to be metabolized and completely excreted in the urine. As with any chemical or medication, these substances have measurable half-lives, which result in diminishing detectable levels after ingestion. This suggests that these substances may have equaled or exceeded the prescribed cutoff level on December 10, 2003, but diminished to a point below the cutoff level on the following day. The Board notices that a split sample of the December 10 specimen was retested, and the positive test result was confirmed. This evidence is persuasive that the controlled substances were present in excess of the Federally-prescribed cutoff levels. Even if the medications taken on December 9 account for the presence of these substances, the Claimant has not documented their chemical content, the dosage levels, or whether they adversely affect his ability to work safely.

The only remaining issues before the Board are whether the Claimant was improperly denied an investigation, whether the Maintenance of Way Operating Rules and the Policy are superseded by the Collective Bargaining Agreement, and whether the discipline is excessive.

Rule 13, the Discipline Rule, in the Parties' Agreement, reflects a universally fundamental right of represented employees in the railroad industry: "[N]o employee who has been in service more than sixty (60) calendar days will be disciplined without first being given an investigation." The Parties, however, over a period of years, have entered into letters of understanding which provide exceptions to the pre-discipline investigation requirement. For example, in 1979, they reached an understanding that an employee who accumulates 60 or more demerits might be terminated without holding an investigation, provided the Carrier notifies the employee and the Organization of each instance in which demerits were assessed. This letter states that the employee's only recourse is the processing of a claim.

The April 1, 1990 Letter of Understanding reads as follows:

It is agreed that, effective April 1, 1990, the provisions of Rule 13 will not be applicable to employees who are placed on medical leave of absence for sixty (60) days as a result of testing positive for a substance prohibited by Carrier's rules, and who, during the sixty (60) day period, fails to furnish a negative urine sample. Such employee will be notified in writing by certified mail, return receipt requested, after the sixty day period has expired of the termination of his seniority and employment. The written notice shall contain an adequate statement of the circumstances resulting in the employee's termination of employment. Copy of this letter will be furnished to the General Chairman together with copy of the letters written by Carrier's Medical Director to the employee.

It was also understood that the above will not preclude the filing and progression of claim filed on the employee's behalf for reinstatement which must

be submitted to this office within 60 days from the date he is notified of termination of his employment.

Clearly, this Letter of Understanding permits the Carrier to terminate an employee who fails to provide a negative urine specimen during the period of his medical leave of absence, subject only to the outcome of a claim filed on his behalf. The Organization's General Chairman signified his concurrence by affixing his signature to this letter. When it was agreed that "the provisions of Rule 13 will not be applicable," the Parties thereby agreed to waive all the terms of that Rule, including the provision that employees may not be disciplined without first being given an investigation.

Then, on June 24, 1991, the Parties executed another Letter of Understanding, which was referred to in the Division Engineer's letter to the Claimant dated November 27, 2002. (See page 2, *supra*). It reads:

This will confirm our understanding reached on June 20, 1991, in connection with the application of Rule 9.0 of the Santa Fe's "Policy On Use Of Alcohol and Drugs" which became effective March 1, 1991, and which all Santa Fe employees were notified by letter dated February 1, 1991, which reads as follows:

[Santa Fe's Rule 9.0 has been supplanted by Section 7.9 of the Policy, but its provisions are substantially the same].

Effective June 1, 1991, an employee who is subject to dismissal under the aforementioned [*sic*] provisions of Rule 9.0 shall be notified in writing by Certified Mail, Return Receipt Requested, to the employee's last known address, copy to the **General Chairman**, of termination of his seniority and employment. The notice shall contain ad [*sic*] adequate statement of the circumstances resulting in the employee's termination of employment.

It was also understood that the above will not preclude the filing and progression of claim filed on the employee's behalf for reinstatement which must be submitted to this office within 60 days from the date he is notified of termination of employment.

The Letter of Understanding dated April 1, 1990, will remain in effect.

If the above correctly reflects our understanding of the manner in which Rule 9.0 cases will be handled, please indicate your concurrence by affixing your signature on the line provided below.

The Organization's General Chairman signified his concurrence by affixing his signature to this letter.

The Board has compared these two Letters of Understanding and considered the Parties' respective arguments. The only essential differences in the two Letters are (1) the circumstances which could result in an employee's summary termination, and (2) the reference to Agreement Rule 13 in the first Letter and its omission in the second Letter.

Although the second Letter, unlike the first, does not contain the phrase, "[T]he provisions of Rule 13 will not be applicable," the Board has to consider whether it was intended, that Rule 13 should be applicable to those employees who are the subject of the second Letter. The Carrier argues that the reference to the first Letter in the second Letter — "The Letter of Understanding dated April 1, 1990, will remain in effect" — determines that no investigation is required. The Neutral Member does not find the issue disposed of so easily.

If, however, the Parties intended in the second Letter to retain the provisions of Rule 13, the Board is caused to question why the second Letter was written at all. If Rule 13 were intended to be applicable under the circumstances described in the Letter of Understanding dated June 24, 1991, the provisions for notice, an adequate statement of the circumstances, and the manner of filing and progressing a claim, with its attendant time limits, would not be necessary. Furthermore, there is no plausible reason why an investigation would be required before termination in the one instance, and not required in the other. One would expect to find consistency among the Agreement's various parts. The Board holds that an investigation is not required under the circumstances provided for in the Letter of Understanding dated June 24, 1991.

The Board notices, in passing, that a third Letter of Understanding dated December 29, 2003, addresses changes in numbering and placement of the Maintenance of Way Operating Rules, the Policy, and the Policy on Employee Performance Accountability (PEPA). It indicates that certain provisions in the Drug/Alcohol Policy have been incorporated, intact, into the PEPA. This Letter of Understanding and concludes with the following paragraphs:

Therefore, this letter will confirm the Party's understanding that the intent of the June 24, 1991 Letter of Understanding will remain intact as long as the Rule exist [*sic*], regardless of its location or numbering.

If the above correctly reflects our understanding of the June 24, 1991 Letter of Understanding, please sign where indicated.

The signatures of representatives of both the Carrier and the Organization are affixed, indicating their concurrence.

The final question which remains is whether the discipline is excessive. The Board finds that the Claimant was clearly put on notice in the Carrier's letter dated April 10, 2003, that he would be subject to periodic testing for five years, and that violation of any of six explicitly listed conditions would subject him to dismissal. He signed his name under this sentence: "I have read and understand the above conditions." When he tested positive for the presence of controlled substances less than a year later, he violated the first listed condition: "More than one confirmed positive test either for any controlled substance or alcohol obtained under any circumstances during any 10-year period."

The Claimant was tested in compliance with the regulatory requirements of the Federal Motor Carrier Safety Administration, U. S. Department of Transportation. The Carrier's Policy is consistent with those and other Federal regulations pertaining to drug and alcohol use in transportation industries. Although the Claimant's personal record has only one previous disciplinary entry, the positive test result on February 5, 2003, two drug offenses within a few months, and the Claimant's relatively short period of service, give the Board no reasonable grounds to sustain the Claim; it will be denied.

AWARD

The claim is denied.
