(c) That claim shall be considered as a continuing one beginning with July 20, 1954, and subsequent dates to be determined from Carrier's records until the violation is corrected.

FINDINGS:

This claim is based on the contention that the work of tying down and untying of trailers on flat cars in the commonly called "piggy-back" operation is work covered by the scope of the Clerks' Agreement.

The "piggy-back" service was inaugurated by the B&O on July 20, 1954 and the aforementioned work has been performed by its Car Department employees.

This same type of claim was presented to the Third Division, National Railroad Adjustment Board, in a case involving this same Brotherhood and the Erie Railroad Company upon which that Division issued its Award No. 7299. The Scope Rule in the Erie Agreement like the same rule in the Clerks' Agreement involved here does not describe the work covered thereby. Insofar as pertinent to a disposition of this dispute, there is no material difference between the Scope Rule in the B&O Clerks' Agreement and the Erie Clerks' Agreement. The type of work asserted to be covered by the Agreement in Award 7299 was identical to the work involved here. In Award 7299 the Board carefully set forth its reasons for finding that this work is not the exclusive work of clerks. We have carefully considered this case and the Opinion of the Board in Award 7299 and find that the reasoning set forth therein (to which we subscribe) is equally applicable here. We find no reason to further labor the subject and accordingly hold that for the reasons set forth in the Opinion of the Board in Award 7299 that this claim should be dismissed.
